Conclusions

Middle layer services are being developed at NSLS II. Implementation details and status of the MASAR, MUNICONV, Lattice/Model, have been discussed. Experience using those services has been summarized. Future development plan has been discussed.

Acknowledgments

The authors would like to thank the EPICS V4 working group for their contributions, especially Matej Sekoranja at COSYLAY, and Michael Davidsaver at BNL. The authors also thank Don Dohan at BNL for his wonderful suggestion and kindness to share the IRMIS schema. Meanwhile, the authors want to thank the DISCS team for their helpful discussion on database. Finally, but not the last, the authors want to thank our colleagues at BNL for their suggestions, and feedback.
