

# Foreword

The Fourth Workshop on Radiofrequency Superconductivity was held at KEK, National Laboratory for High Energy Physics from 14 to 18 August 1989, two years after the third workshop organized at Argonne National Laboratory. The workshop was attended by 121 people from 8 countries.

In Vol. 1 of the Proceedings (*corresponding to the first six sessions in this electronic version*), Laboratory talks and Review talks have been included. Vol. 2 (*corresponding to the remaining sessions in this electronic version*) contains papers presented at the poster sessions and papers that were submitted for publication only.

We would like to thank the program committee for their efforts in organizing the workshop, all authors for delivery of camera ready manuscripts and K. Asano for preparation of the proceedings.
