

Dieter Möhl

at Jülich

14th June 2013

COOL '13

How I met Dieter Möhl

- **1983 I started as PhD student in Jülich**

Topic: Design of a cooler synchrotron and storage ring

My experience in accelerator physics: None

How to learn about accelerator physics: Go to CERN

There I met Dieter Möhl the first time

We asked all questions about accelerators, beam cooling and related topics

Dieter Möhl listened always calm, patient and answered all our questions, gave advices, discussed

Dieter Möhl was member of

- The COSY Machine Advisory Committee
- The 1st COSY scientific council
- The 1st COSY Program Advisory Committee

1987: 1st Scientific Council and roofing ceremony for COSY

May 1991: 1st COSY PAC meeting

With his advices Dieter Möhl gave much impact to the success of COSY

His advice was always appreciated

I remember him as a patient teacher

In the name of my colleagues in Juelich I want to thank Dieter Möhl for many fruitful discussions and his patience all the time.
