# Refereeing at FEL2010

# Refereeing at FEL2011?

# Useful improvements

- The referee selection routine should exclude the authors of the paper.
- Add the referee as a choice of recipients in the e-mail utility.
- Add 'none' to the values for 'editor status' and referee status in the search screen.
- Add 'Referee assigned' (Yes/No) to the search screen.

# Disadvantages of this refereeing process

- Multiple editing of papers.
  - If source files are used, new yellow dots will be produced.
  - All PitStop editing lost.
