SPMS and SourceForge

JACoW Team Meeting 2011 – SINAP

Ivan Andrian <ivan.andrian@elettra.trieste.it>

JACoW

JACoW use of SF

- Primarily is a tool for developers

- The GIT repository rocks!

  - Became the reference for the developers

  - Keeps all the commits

  - Easy and quick to use

  - For both SPMS and UDS

- There's plenty of space for JPSP as well

  - Volker, please consider joining SF!

GIT statistics

Download statistics

Mailing lists

- Easy tool – and it keeps history on SF.net

- JACoW-SPMS-releases@lists.sourceforge.net

  - Just created!

  - To notify "key people" of new releases/deployments

- Other needs?

  - ……………………………

  - ……………………………

  - ……………………………

What's happening to the project?

- New files:
  - automatic RSS feed
- New GIT commits
  - SF.net GIT log
  - Develop | What's happening?
- Mailing lists
- Tracker
  - RSS feed as well!

JACoW

Trackers – user request!

- Project Trackers

    – **Bugs** - Bug Tracking System

    – **Support Requests** - Tech Support Tracking System

    – **Patches** - Patch Tracking System

    – **Feature Requests** - Feature Request Tracking System

    – **Registration bugs** - Any problem related to the SPMS registration module

    – **Registration feature requests** - New functionality requested for the SPMS registration module

JACoW

We have a wiki as well!

What do we want the wiki for?

- Up to now, for technical notes on development

- Transfer the documentation here as well?

- Other proposals:

  - ....

  - ....

  - ....
