

Preface

The 13th International Beam Instrumentation Conference (IBIC2024) took place from September 9 to 13, 2024, in Beijing, China. This academic conference, hosted by the Institute of High Energy Physics, Chinese Academy of Sciences, gathers worldwide experts of the accelerator community and related technologies.

In the 5-day conference, 320+ participants from 18 countries and regions registered. Speakers of 16 invited oral talks, 2 tutorials, 18 contributed oral talks, and 160 poster presenters presented their recent scientific achievements. We all have been inspired by the rapid advances in the field of beam instrumentation worldwide, and deeply impressed by active academic exchanges between participants from different countries and regions. Your participation has made IBIC2024 a great success.

It is worthwhile to mention the special support of JACoW team and our sponsors and exhibitors and the companies for their involvement in the academic activities of IBIC2024 in different manners.

Finally, we want to take this opportunity to thank all the members of the Local Organizing Committee, the Scientific Program Committee, the International Organizing Committee, all session chairs, and volunteers. All of the people involved worked hard to make sure the conference ran smoothly.
