

# UPGRADING ORACLE APEX APPLICATIONS AT THE NATIONAL IGNITION FACILITY

MOPV047

Anumeha Bhasker, Raelyn D. Clark, Robert N. Fallejo  
Lawrence Livermore National Laboratory (LLNL)

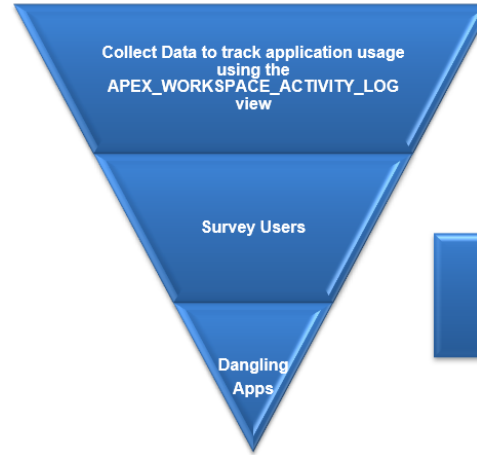

## Section I

### NIF APPLICATIONS & UPGRADE METHODOLOGY

## Section II

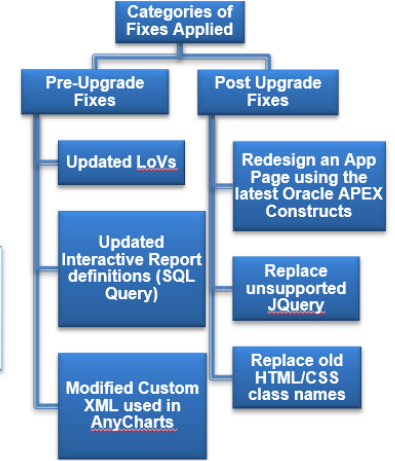

### IDENTIFY OBSOLETE FUNCTIONALITIES

### FIX FORWARD COMPATIBILITY

### PRE-UPGRADE & POST-UPGRADE FIXES

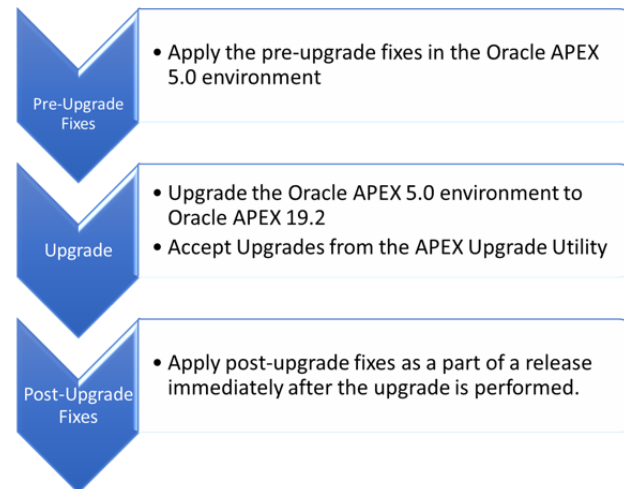

## ORACLE APEX 19.2 UPGRADE UTILITY

Upgrade Type	Candidate Objects
Enable Save Public Report for Interactive Reports	6
Enable Subscription for Interactive Reports	149
Enable Rows Per Page Selector for Interactive Reports	5
Numeric, Required, and Date Picker Item updates based upon conditional validations	1
Enable fixed report headers to the top of the page, for Interactive Reports	1
Upgrade AnyChart Charts to Oracle JET Charts	109
Upgrade Tabular Form to Interactive Grid	62
Upgrade Legacy Form page to page containing Form Region, where appropriate	19

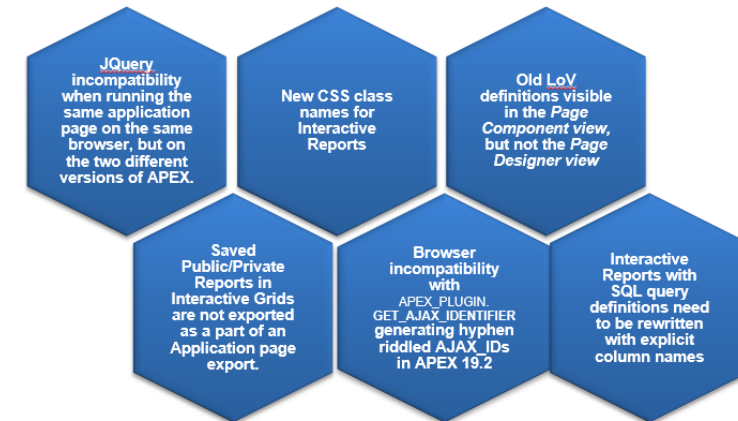

The in-built 'Upgrade Application' Utility makes recommendations for individual features in pages eligible for upgrade.

## Section III

### UPGRADE AND DEPLOYMENT

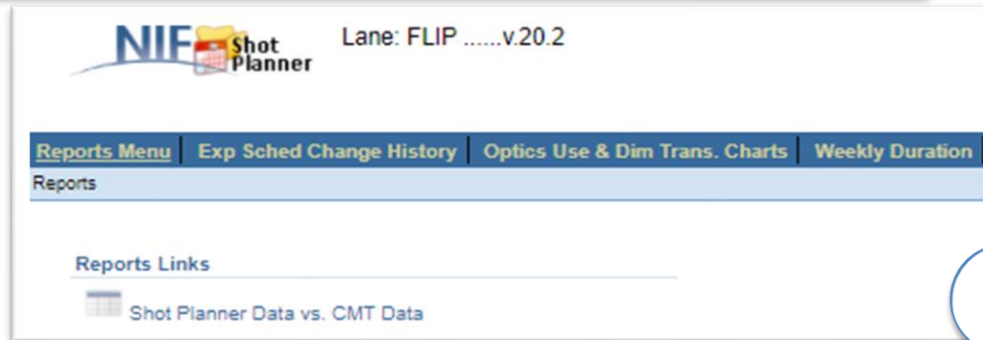

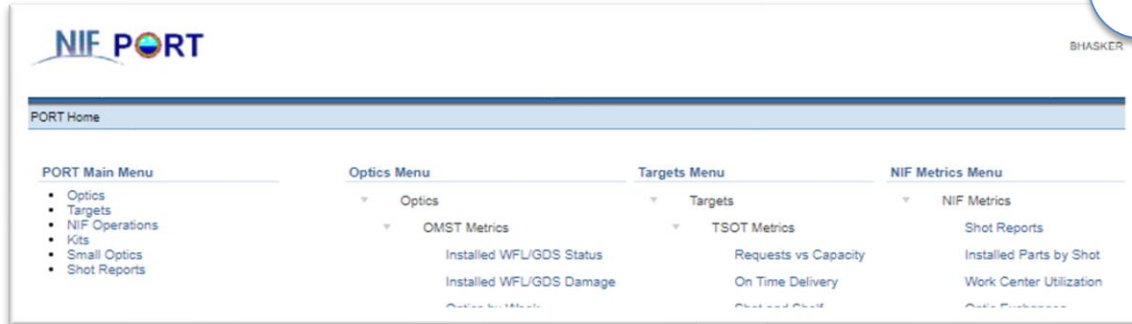

## NOTABLE LESSONS LEARNED

## Section IV

# NIF APPLICATIONS & UPGRADE METHODOLOGY

Identify all Obsolete Application Pages

Set up an APEX 19.2 environment for testing

Fix Forward Incompatibility

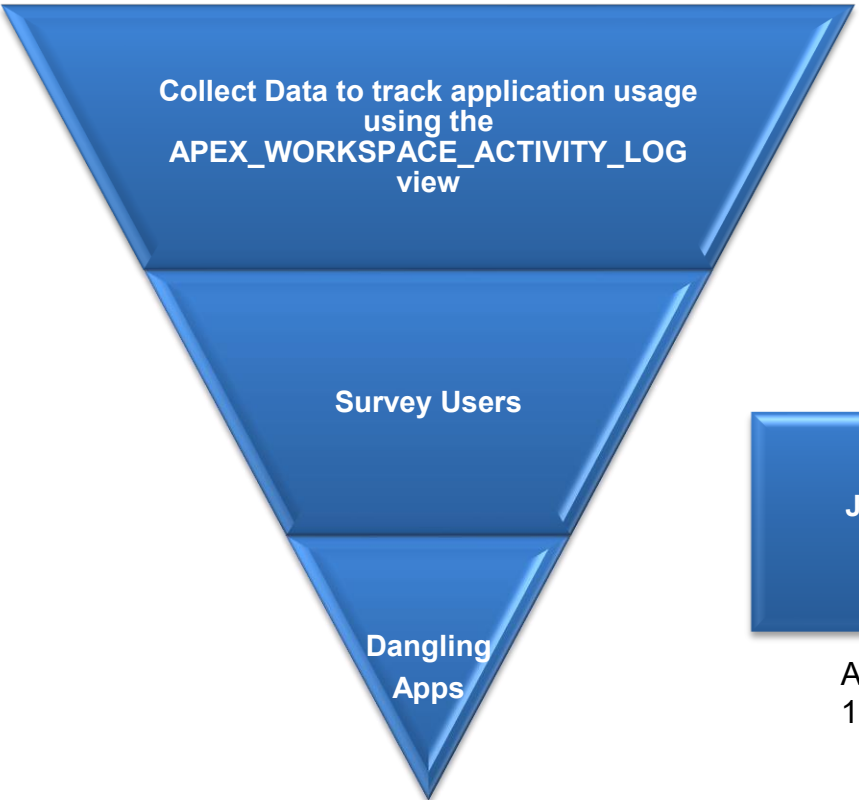

Deploy Pre-Upgrade Fixes

Line Up Post-Upgrade Fixes

Oracle APEX Upgrade Utility Recommendations

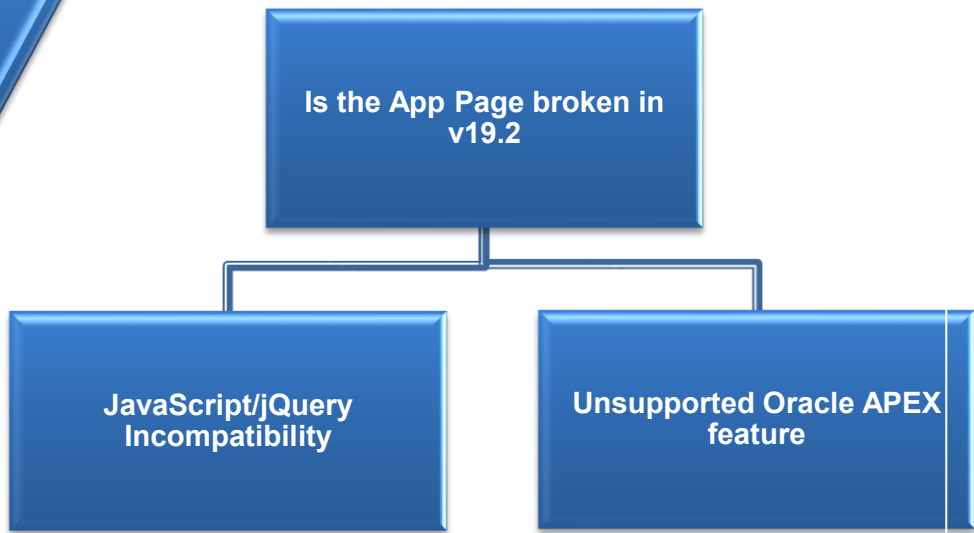

Upgrade and Deploy Post-Upgrade Fixes

## IDENTIFY OBSOLETE FUNCTIONALITIES

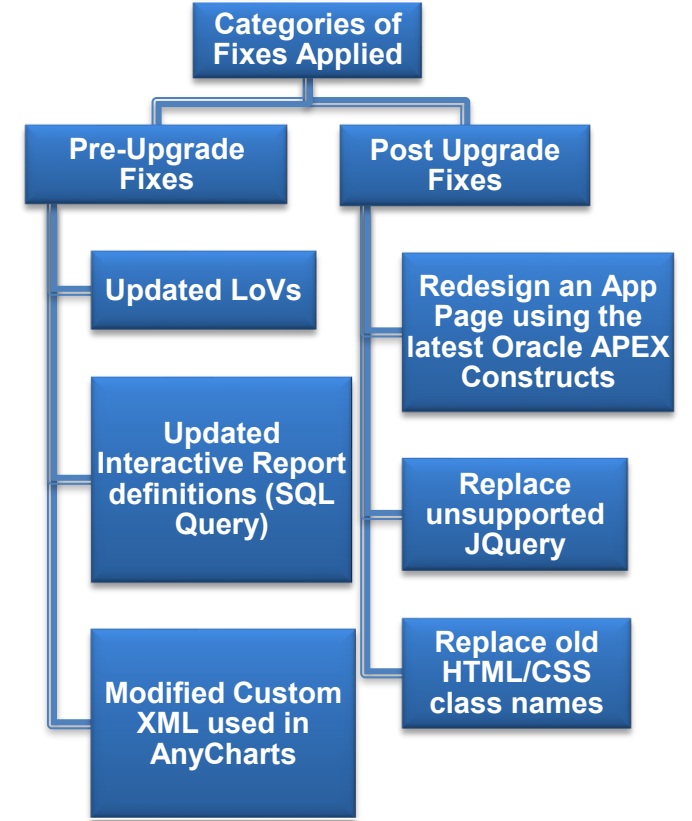

Identify Legacy Application Functionalities that are now obsolete.

## FIX FORWARD COMPATIBILITY

After setting up a test environment with Oracle APEX 19.2, identify broken application functionalities

## PRE-UPGRADE & POST-UPGRADE FIXES

Apply fixes that allow application pages to work in both versions. The fixes that only work in the upgraded environment are exported and lined up for an immediate software release following the Application environment upgrade.

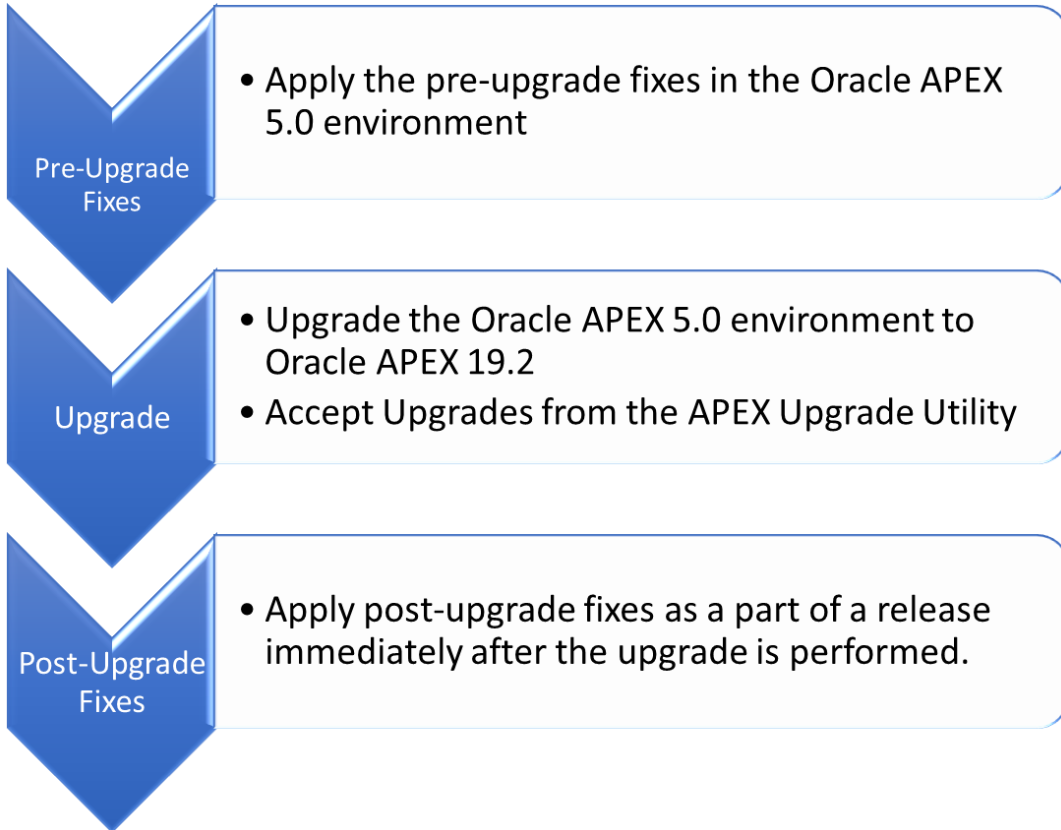

## ORACLE APEX 19.2 UPGRADE UTILITY

Upgrade Type	Candidate Objects
Enable Save Public Report for Interactive Reports	6
Enable Subscription for Interactive Reports	149
Enable Rows Per Page Selector for Interactive Reports	5
Numeric, Required, and Date Picker Item updates based upon conditional validations	1
Enable fixed report headers to the top of the page, for Interactive Reports	1
Upgrade AnyChart Charts to Oracle JET Charts	109
Upgrade Tabular Form to Interactive Grid	62
Upgrade Legacy Form page to page containing Form Region, where appropriate	19

1 - 8

- The in-built 'Upgrade Application' Utility makes recommendations for individual features in pages eligible for upgrade.
- An upgrade should be accepted as-is only if it results in a *functional equivalent* of the original application, generally speaking.
- For example, accepting the upgrades to upgrade Tabular Forms (which are still compatible with Oracle APEX 19.2) to Interactive Grids did not result in functioning pages, and required further re-design of the page. Such upgrades were selectively applied during this phase of the upgrade. Other upgrades, such as 'Enable Group By for Interactive Reports' or 'Enable Save Public Reports' were accepted using this utility, as they only enhanced the features on the page.

## UPGRADE AND DEPLOYMENT

## NOTABLE LESSONS LEARNED

## CONCLUSION

This upgrade to Oracle APEX 19.2 allows for these aging Oracle APEX applications to function in a more sustainable way, while enhancing user experience with a more modernized GUI for existing and future Oracle APEX webpages.
