

Indico: Event Management

<http://indico-software.org>

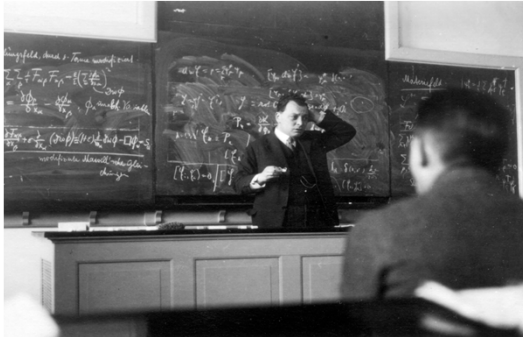

JACoW 2010
16th November 2010

Jose Benito Gonzalez Lopez
CERN IT-UDS
Audiovisual and Conferencing Services

- General Overview of Indico
- Events management
- JACoW and Indico
- Other functionalities

What is Indico About?

Event organisation: for events of all sizes: lectures, meetings, conferences

Data repository: Long term archiving of all data related to the event and of all related files (ppts, pictures, videos, minutes...)

CERN

- 2500 employees, 8000 collaborators
- Huge number of meetings per day
- 175 meeting rooms

Need for a tool

- to store and retrieve all events descriptions and related material
- Provide synthetic views on the collaborative activities and easy integration with personal schedulers

Indico was born as a European project (2002-2004)

From 2004 (CHEP), Indico is in production and developed at CERN

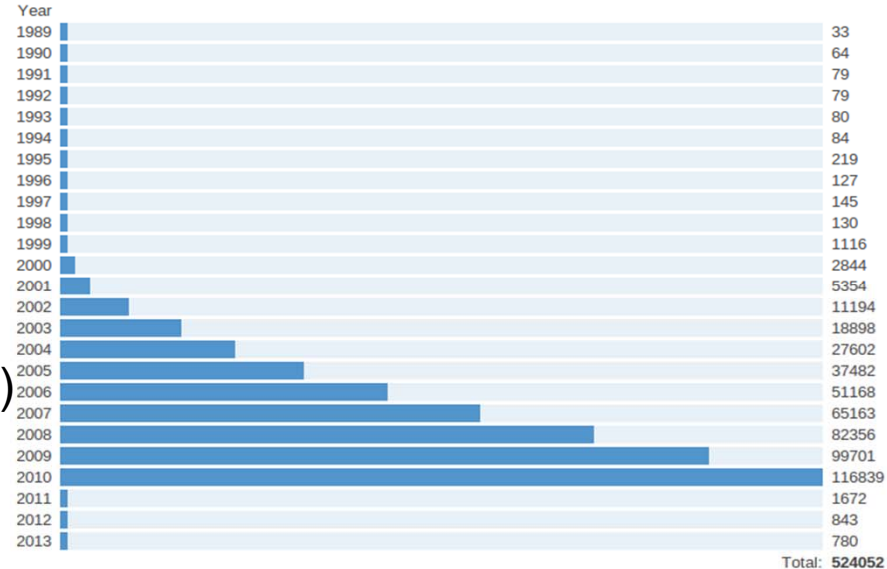

Indico Worldwide

Indico team: Currently 2 staff, 4 students

CERN server hosts today:

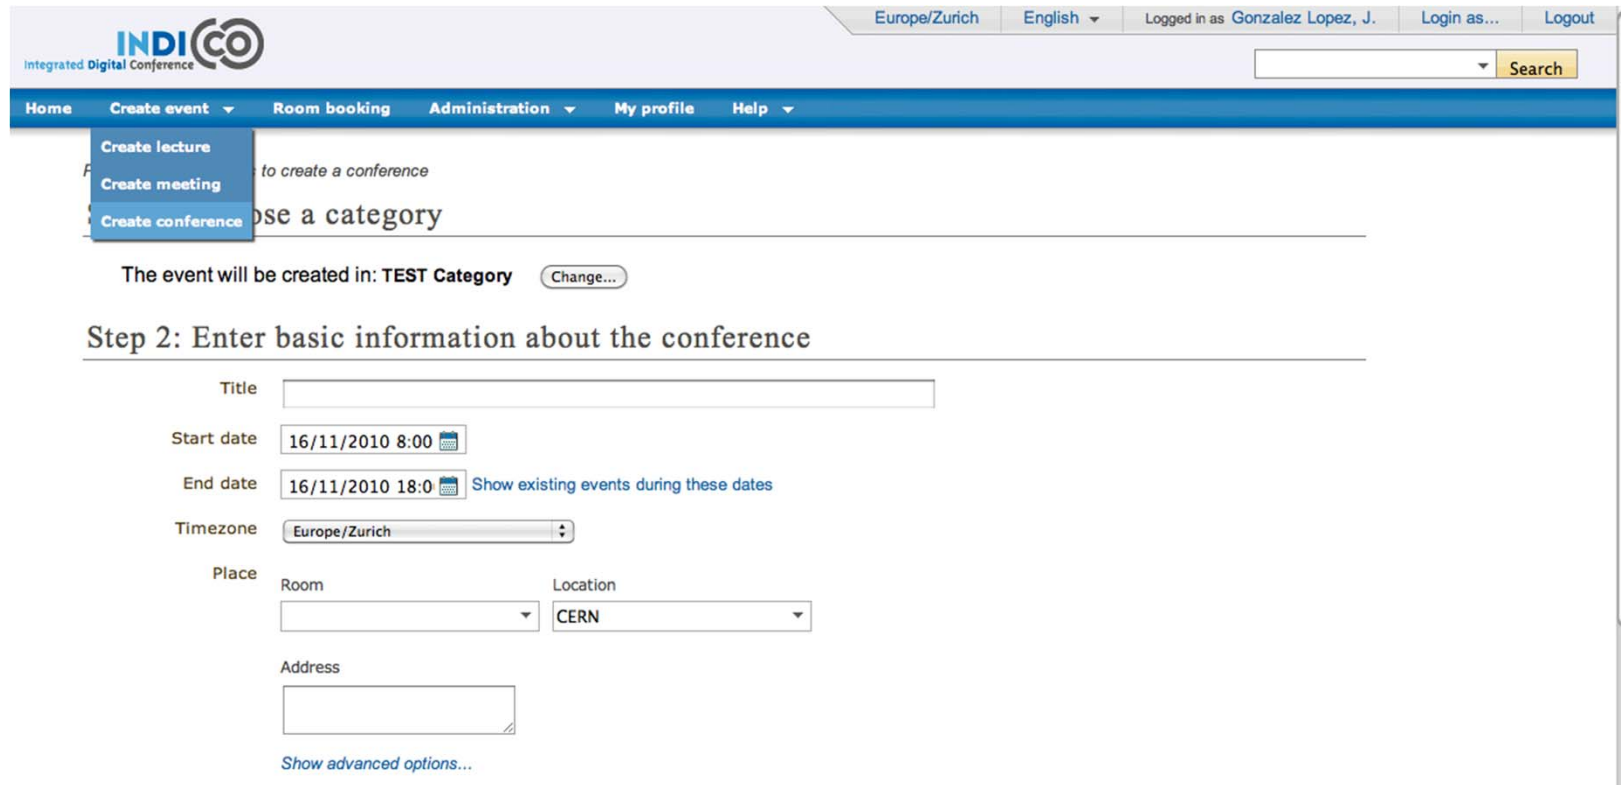

- More than 115.135 events
- More than 524.052 presentations
- More than 699.808 files (several TBs)

Installed also in many organizations worldwide (~89)

See: <http://indico-software.org/wiki/IndicoWorldWide>

Main goal: Creation of events should be easy

The screenshot shows the INDIco (Integrated Digital Conference) web interface. At the top, there is a header with the CERN logo, the INDIco logo, and navigation links for Europe/Zurich, English, and user login/logout. A search bar is also present. Below the header is a blue navigation bar with links: Home, Create event, Room booking, Administration, My profile, and Help. The 'Create event' link is expanded, showing a dropdown menu with options: Create lecture, Create meeting, and Create conference. The 'Create conference' option is selected, leading to a form titled 'Step 2: Enter basic information about the conference'. The form includes fields for Title, Start date (16/11/2010 8:00), End date (16/11/2010 18:00), Timezone (Europe/Zurich), and Place (Room and Location). The Location field is set to CERN. There is also an Address field and a link to 'Show advanced options...'. A message at the top of the form states: 'The event will be created in: TEST Category' with a 'Change...' button.

Features: Information Retrieval

The screenshot displays the ATLAS Meetings website. At the top, there's a navigation bar with links for 'Home', 'Create event', 'Room booking', 'Administration', 'My profile', and 'Help'. A search bar is located in the top right corner. The main content area is titled 'Search' and shows a list of meetings. The first meeting listed is 'W tag and probe meeting' on 2010-11-15 at 14:30:00 (CET). Below it are 'Jet Trigger Signature Group Meeting' on 2010-11-15 at 14:00:00 (CET), 'Multi-Object paper Discussion' on 2010-11-17 at 17:00:00 (CET), and 'Distributed Analysis Development' on 2010-11-17 at 15:30:00 (CET). Each meeting entry includes a title, date, time, and a 'more' link for details. On the left side, there's a sidebar with a calendar for November 2010 and a list of categories: 'CERN-Related', 'Committees', 'Conferences', 'Departments', 'Experiments', 'Projects (7330)', 'Seminars and Workshops', and 'TEST Categories'. The bottom of the page shows a footer with 'Page 1' and 'Next >'.

3 Types of Events

- Lectures
- Meetings
- Conferences

Features: Lecture Management

Simple and clear display of all data related to the lecture (date and time, location, title and abstract, speaker, material like slides or video)

Additional features:

- Poster creation
- Evaluation form creation (and detailed result analysis)
- Room booking
- Webcast
- Recording

Features: Lecture Management

Climate Change: The Physical Basis and Latest Results

by **Thomas Stocker** (Physics Institute, University of Bern)

Thursday 03 September 2009 from **16:30** to **17:30** (Europe/Zurich)
at **CERN (Main Auditorium**)**

Description *The 2007 Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) concludes: "Warming in the climate system is unequivocal." Without the contribution of Physics to climate science over many decades, such a statement would not have been possible. Experimental physics enables us to read climate archives such as polar ice cores and so provides the context for the current changes. For example, today the concentration of CO₂ in the atmosphere, the second most important greenhouse gas, is 28% higher than any time during the last 800,000 years. Classical fluid mechanics and numerical mathematics are the basis of climate models from which estimates of future climate change are obtained. But major instabilities and surprises in the Earth System are still unknown. These are also to be considered when the climatic consequences of proposals for geo-engineering are estimated. Only Physics will permit us to further improve our understanding in order to provide the foundation for policy decisions facing the global climate change challenge.*

Material Poster  Video in CDS

Organised by Luis Alvarez-Gaume / PH-TH ----- **Tea and Coffee will be served at 16:00

Monitoring Working Group

by Serguei Kolos (UCI)

Thursday 17 September 2009 from **15:00** to **18:00** (Europe/Zurich)
at **CERN (13-1-017)**

Description Phone conference is available via CERN Standard: +41 22 7677000

Thursday 17 September 2009

15:00 - 15:20 Introduction 20'

Speakers: Serguei Kolos (UCI)

Material:

15:20 - 15:40 A proposal on the DQM Core evolution 20'

Speakers: Serguei Kolos(UCI)

Material:

15:40 - 16:00 DQM Algorithms & SummaryMakers: status and new features 20'

Speakers: Evan Arthur Wulf (Physics Dept., Pupin Physics Lab.-Columbia University-Unknown)

Material:

16:00 - 16:20 DQMF issues 20'

Speakers: Serguei Kolos(UCI)

Material:

Features: Conference Management

One tool only for managing the event lifecycle

- 1) Creation, configuration and management of the conference web portal
- 2) Definition of the conference tracks/themes
- 3) Registration
 - Badge creation
 - Online payment
 - Mailings
- 4) Call for abstract
 - Abstract selection
- 5) Creation and display of the timetable
 - Plenary, parallel or poster sessions
- 6) Submission of presentations and final papers
 - Review and edition
- 7) Evaluation form
- 8) Creation of the conference proceedings

Features: Conference Management

.Conference Portal: Total Customization

Features: Conference Management

• Proceedings

- Volker's scripts? Possibility to automatically use them from Indico?
- For proceedings we need:
 - DB of authors
 - DB of affiliations
 - It would be possible to add this info to Indico! (Plugin)

JACoW vs Indico

.Yesterday's pre-meeting:

- Is it possible to integrate JACoW and Indico?

.Goal:

- An organizer that wants to use Indico, together with...
- ...the JACoW profiles to ensure...
- ...great proceedings thanks to Volker's scripts

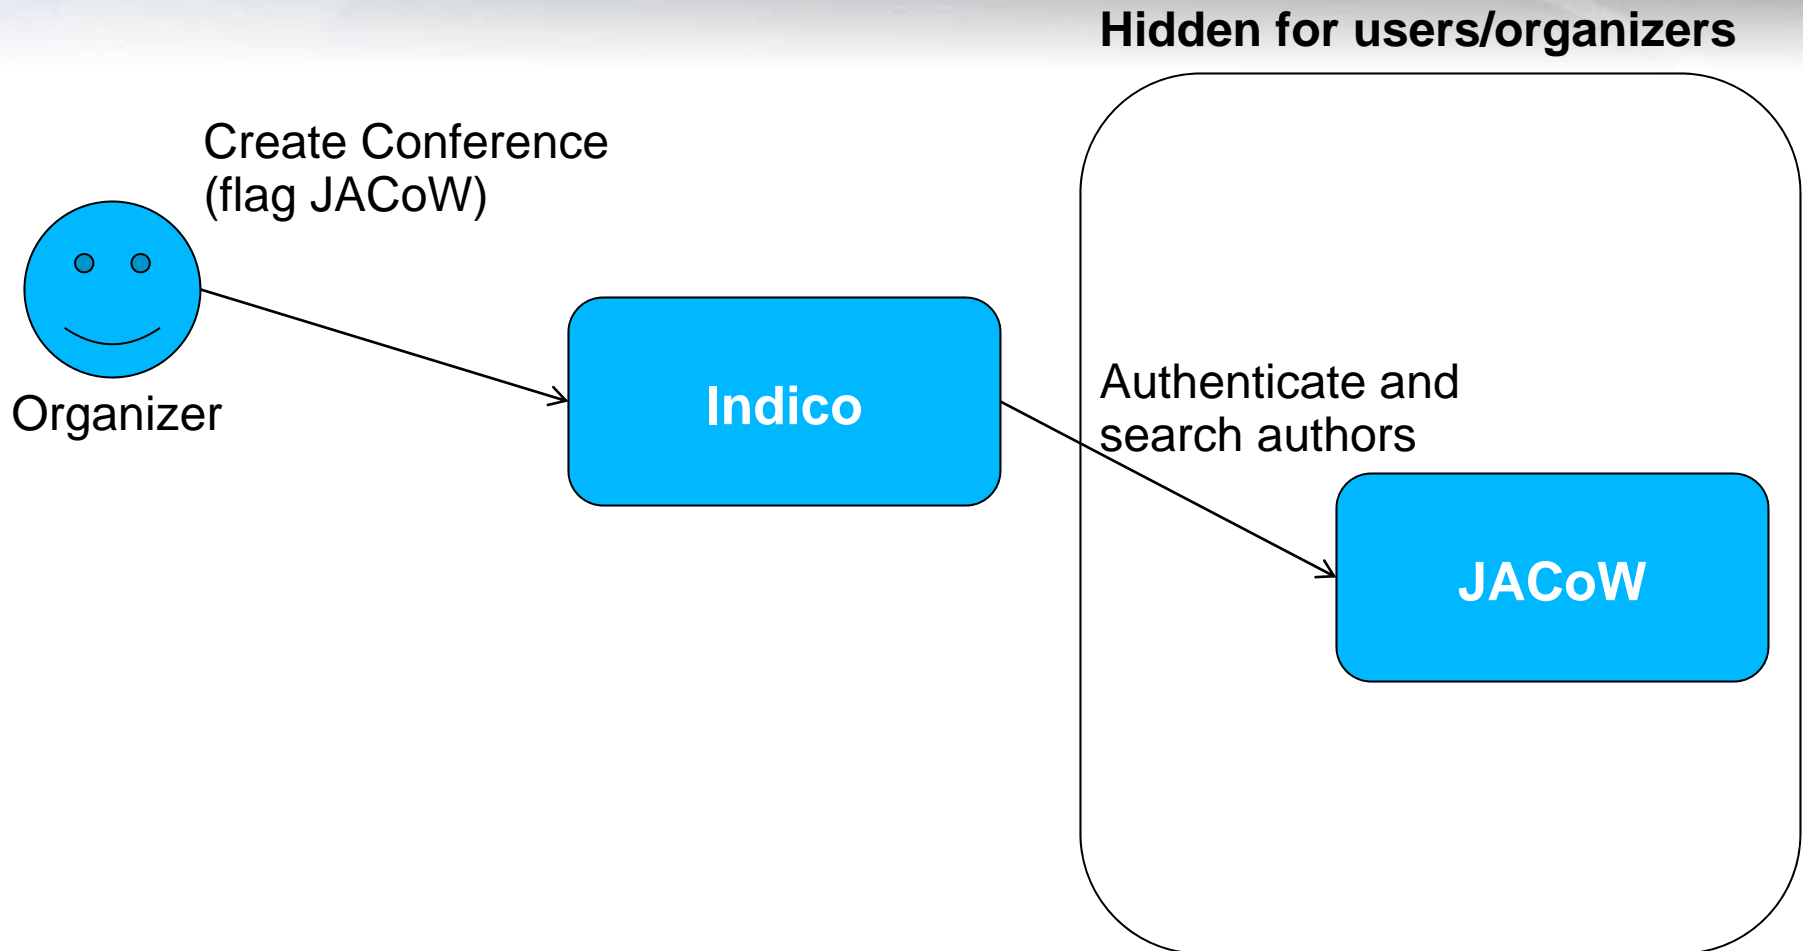

.How to do this:

- Plugin on Indico in order to *authenticate* and *fetch* profiles from JACoW database
- At CERN, we already have a similar plugin to authenticate CERN users!

.2 options:

- Using a dedicated Indico installation for JACoW
- Using local Indico at the institution

JACoW vs Indico

JACoW vs Indico

.Some requirements:

- Replace free text for authors with search tools everywhere
- Disabling edition of author data
- Allow JACoW login for some conferences
- ...

.and decisions:

- Dedicated server vs Already existing Indico
- Who is developing what? And When?
